PRODUCT SUITABILITY

WHO IS THE PRODUCT SUITABLE FOR?

- The Fund is only suitable for investors who:
 - seek a total return of capital growth and income over the medium to long-term;
 - seek exposure to RMB and listed and unlisted RMB denominated fixed income instruments; and
 - are willing and able to accept that their principal will be at risk.

You should consult your financial advisers if in doubt about whether this product is suitable for you.

Further information

Refer to Para 7.2 of the Prospectus for further information on product suitability.

KEY PRODUCT FEATURES

WHAT ARE YOU INVESTING IN?

- You are investing in a unit trust constituted in Singapore that aims to provide a total return of capital growth and income over the medium to long-term.
- The Manager currently intends to make monthly distributions of approximately 4-7% per annum of the NAV per Unit to Holders of each Class.
- The base currency of the Fund is RMB.

Refer to Para 5.1, 7.1 and 7.3 of the Prospectus for further information on features of the Fund.

Investment Strategy

- To achieve its investment objective, the Fund will invest by virtue of the Manager's quota and capacity under the RQFII framework, primarily in a portfolio of fixed income instruments issued onshore in the PRC which may include, but will not be limited to, certificates of deposits, preferred shares, fixed and floating bonds, convertible bonds, notes, bond and money market funds, and such other fixed income instruments issued in the PRC by governments, government entities, quasi-government entities, corporations and/or financial institutions (known collectively as "**Onshore RMB Income Instruments**").
- Although the Fund will invest primarily in Onshore RMB Income Instruments, the Fund may, at the absolute discretion of the Manager, invest in fixed income instruments issued offshore outside of the PRC and that are denominated in RMB as well. The Fund may also invest in fixed income instruments issued by Chinese entities that are denominated in currencies other than the RMB.
- The Fund may also invest in investment grade bonds and non-investment grade bonds, all of which will be subject to a minimum credit rating of "B-" by Standard & Poor's or an equivalent rating by Moody's Investors Service or Fitch Ratings. If a credit rating is not available from any of the 3 aforementioned rating agencies, the Manager will use its internal credit rating to ensure that the Fund is in compliance with the above credit rating requirements.
- There is no target industry or sector.
- Under current regulations in the PRC, foreign investors (such as the Fund) may invest in certain eligible onshore PRC investments through entities that have obtained status as a QFII or RQFII from the CSRC. The Fund invests in the Onshore RMB Income Instruments through the Manager's status as a RQFII, using an investment quota granted to the Manager by SAFE.

Refer to Para 7.1 of the Prospectus for further information on the investment strategy of the Fund.

¹ The Prospectus is available for collection at the Managers' business address at 12 Marina View, #18-02, Asia Square Tower 2, Singapore 018961 during usual business hours or accessible at www.nikkoam.com.sg.

² The SGD Class and the USD Class have each not been incepted yet.

Parties Involved

KEY RISKS

| | |
|--|---|
| <p>WHAT ARE THE KEY RISKS OF THIS INVESTMENT? You should be aware that the price of Units can go down as well as up. The value of the Fund and its distributions (if any) may rise or fall. The following are key risk factors that may cause you to lose some or all of your investment:</p> | <p>Refer to Para 9 and 15 of the Prospectus for further information on risks of the Fund.</p> |
|--|---|

Market and Credit Risks

| | |
|---|--|
| <ul style="list-style-type: none"> • You are exposed to market and interest rate risk <ul style="list-style-type: none"> ○ Prices of securities may go up or down in response to changes in the economic conditions, the interest rates, and the market’s perception of securities of the relevant country. These may cause the prices of Units to go up or down as the prices of Units are based on the current market value of the investments of the Fund. • You are exposed to the risk of investing in foreign securities <ul style="list-style-type: none"> ○ The investments of the Fund may be affected by political instability as well as exchange controls, changes in taxation, foreign investment policies and other restrictions and controls which may be imposed by the relevant authorities in the other countries. • You are exposed to foreign exchange risk. <ul style="list-style-type: none"> ○ As the investments of the Fund may be denominated in foreign currencies (other than the base currency of the Fund i.e. RMB), fluctuations of the exchange rates of foreign currencies against the base currency of the Fund (i.e. RMB) may affect the value of Units. | |
|---|--|

Liquidity Risks

| | |
|--|--|
| <ul style="list-style-type: none"> • The Fund is not listed and you can redeem only on Dealing Days. <ul style="list-style-type: none"> ○ There is no secondary market for the Fund. All realisation requests should be made to the Manager through the approved distributors from whom the Units were purchased. Institutional investors who had purchased their Units directly from the Manager may submit their realisation requests to the Manager. ○ If there is a surge in realisations at any particular time, the Manager may impose a gate on realisations. If that happens, payment of realisation proceeds to you may be delayed. ○ In addition, you may not realise your Units during any period where realisation is suspended. | |
|--|--|

Product-Specific Risks

| | |
|--|--|
| <ul style="list-style-type: none"> • You are exposed to risks regarding RQFII status and RQFII quota. <ul style="list-style-type: none"> ○ You should note that the Manager’s RQFII status may be suspended or revoked and that this may adversely affect the Fund’s performance by requiring the Fund to dispose of its securities holdings. You should also note that the Fund may not be allocated a sufficient portion of the RQFII quota from the Manager to meet all applications for subscription into the Fund and that redemption requests may not be processed in a timely manner due to adverse changes in relevant laws or regulations. • You are exposed to repatriation and liquidity risks. <ul style="list-style-type: none"> ○ Certain restrictions imposed by the Chinese government on RQFIIs may have an adverse effect on the Fund’s liquidity and performance. Any restrictions on repatriation of the invested capital and net profits may impact the Fund’s ability to meet redemption requests from Holders. Furthermore, as the China Custodian’s review on authenticity and compliance is conducted on each repatriation, the repatriation may be delayed or even rejected by the China Custodian in case of non-compliance with the RQFII rules and regulations. • You are exposed to sole broker / counterparty risk. <ul style="list-style-type: none"> ○ While the Manager will endeavour to take all reasonable steps to obtain the best possible result for each transaction entered into by the Fund, there may be circumstances requiring transactions to be executed through the use of a sole broker or counterparty which may not be consistent with best execution standards. • You are exposed to PRC market risk. <ul style="list-style-type: none"> ○ Investing in the securities markets in the PRC is subject to the risks of investing in emerging markets generally and the risks specific to the PRC market. Investments in the PRC will be sensitive to any significant change in political, social or economic policy in the PRC. Such sensitivity may adversely affect the capital growth and thus the performance of these investments. | |
|--|--|

- **You are exposed to income distribution risk.**
 - Sources of income for distribution include dividend and/or interest income and/or capital gains derived from the investments of the Fund. Such dividend and/or interest income may be adversely affected by events such as but are not limited to companies suffering unexpected losses, having lower than expected dividends and adverse exchange rate fluctuations. In addition to distributions out of distributable income and/or capital gains, the Manager may make capital distributions to Holders at such time as they deem fit in accordance with the provisions of the Deed. Where distributions are paid out of capital, the NAV of the relevant Class will be reduced and this will be reflected in the realisation price of the Units of that Class. Holders redeeming their Units may therefore receive an amount less than their initial investment. Such distributions may also result in reduced future returns to Holders.
 - **You are exposed to tax risk.**
 - Investing in the Fund may have tax implications for a Holder depending on the particular circumstances of the Holder. Furthermore, by investing in securities (including shares and debt instruments) issued by PRC tax resident enterprises, irrespective of whether such securities are issued or distributed onshore or offshore, the Fund may be subject to PRC taxes.
 - **You are exposed to financial derivative instruments (“FDIs”) risk**
 - **The Manager may invest in FDIs for the purposes of hedging and/or efficient portfolio management and/or optimising returns and/or for such other purposes as may be permitted by the Authority.** FDIs involve risks different from, and in some cases, greater than, the risks presented by more traditional investments. Some of the risks associated with FDIs are market risk, management risk, credit risk, liquidity risk, moratorium risk, capital control risk, tax risk and leverage risk.
 - **The Fund may invest into underlying funds which use or invest in FDIs, and it is possible that the Fund’s NAV may be subject to volatility due to the Fund’s or the underlying funds’ usage or investment in FDIs.**
- You should be aware that your investment in the Fund may be exposed to other risks of an exceptional nature from time to time.
