#### **KEY PRODUCT FEATURES**

#### WHAT ARE YOU INVESTING IN?

- The Managers have the absolute discretion to determine whether a distribution is to be made to Holders. Such distribution (if any) will be made in accordance with the provisions of the Deed. The Managers may make capital distribution to Holders at such time as they deem fit in accordance with the Deed. Where distributions are paid out of capital of the Fund or the relevant Class, the capital and the NAV of the Fund or the relevant Class will be reduced and this will be reflected in the realisation price of the Units of the Fund or the relevant Class.
- Currently, you can invest in the SGD Class Units. The RMB Class Units, the USD Class Units and the SGD Class B Units will be available for subscription at such time as the Managers may decide.
- The base currency of the Fund is SGD.

# Investment Strategy

- The Fund invests primarily in stocks listed on the SGX-ST.
- The Fund may also invest in companies listed on stock exchanges outside Singapore subject to a limit not exceeding 30% of the total value of the deposited property of the Fund or such other amount as agreed from time to time between the Managers and the Trustee.
- The Fund invests in Singapore and Asia Pacific countries. There is no target industry or strategy of the sector.
- The Managers believe that active investment management can add value to investors. They seek to add value by selectively over/under weighting benchmark components to achieve relative out-performance and carefully blending the mix with a selection of non-benchmark components to deliver absolute out-performance.

Refer to Para 7 of on risks of the Fund.

#### **Market and Credit Risks**

#### You are exposed to market risk in Singapore and other Asia Pacific countries

The price of securities comprised in the portfolio of the Fund and the Units, and the income from them, may be influenced by political and economic conditions, changes in interest rates, the earnings of the corporations whose securities are comprised in the portfolio, and the market's perception of the securities.

#### You are exposed to currency risk

 As investments of the Fund may be denominated in foreign currencies other than the base currency of the Fund or the Class Currency of the relevant Class within the Fund, fluctuations in the exchange rates of these foreign currencies may have an impact on the value of the Units of the Fund.

# Liquidity Risks

### The Fund is not listed and you can redeem only on Dealing Days.

- o There is no secondary market for the Units. All realisation requests should be made to the Managers through the approved distributors from whom the Units were purchased. Institutional investors who had purchased their Units directly from the Managers may submit their realisation requests to the Managers.
- If there is a surge in realisations at any particular time, the Managers may impose a gate on realisations. If that happens, realisation of Units and/or payment of realisation proceeds to you may be delayed.
- In addition, you may not realise your Units during any period where realisation is suspended.

# You are exposed to foreign securities risk

- The investments of the Fund may be affected by political instability as well as exchange controls, changes in taxation, foreign investment policies and other restrictions and controls which may be imposed by the relevant authorities in the other countries.
- The legal infrastructure and accounting, auditing and reporting standards in certain countries in which an investment may be made may not provide the same degree of investor protection or information to investors as would generally apply in major securities markets. Foreign ownership restrictions in some markets may mean that corporate action entitlements in relation to any collective investment schemes or other investments the Fund is invested in, may not always be secured or may be restricted.
- In addition, the Fund invests in emerging markets securities which are in general more volatile than those of developed countries, with the result that Units may be subject to greater price volatility.

As at the date of registration of the Prospectus, the Managers only use FDIs for purposes of hedging and/or efficient portfolio management.
