Common Reporting Standard and Automatic Exchange of Information

Following the development by the Organisation for Economic Cooperation and Development of a common reporting standard ("**CRS**") to achieve a comprehensive and multilateral automatic exchange of information, the Income Tax (International Tax Compliance Agreements) (Common Reporting Standard) Regulations 2016 (the "**CRS Regulations**") have been promulgated to allow Singapore to implement the CRS with effect from 1 January 2017. Singapore has committed to commence exchange of information under the CRS in 2018.

The CRS Regulations require certain Singapore financial institutions (as defined in the CRS Regulations) to identify financial asset holders and establish if they are resident for tax purposes in countries with which Singapore has a tax information sharing agreement. Singapore financial institutions will then report financial account information of the asset holder to the Singapore tax authorities, which will thereafter automatically transfer this information to certain competent foreign tax authorities on a yearly basis.

Accordingly, the Managers and/or the Trustee (as defined in paragraph 3 of this Prospectus) will require investors to provide, amongst other things, information in relation to their identities and tax residences of their accounts (and the controlling persons, if any), account details, reporting entity, account balance/value and income/sale or redemption proceeds and any additional documentation or

information, which will then be reported to the Inland Revenue Authority of Singapore and the other relevant tax authorities for purposes of complying with FATCA, the CRS Regulations and any similar automatic exchange of tax information regimes.

You should consult your professional advisers on the possible tax and other consequences with respect to the implementation of FATCA and CRS.

This Sub-Fund is only suitable for investors who seek medium to long-term capital appreciation by investing primarily in equity securities listed in Singapore and who are willing and able to accept that their principal will be at risk and that the value of their investment and any derived income may fall as well as rise.

VIA DISTRIBUTION POLICY

- 30.1 The Managers have the absolute discretion to determine whether a distribution should be made in respect of any Sub-Fund. Any such distribution will be made in accordance with the relevant provisions of the Deed.
- 30.2 The Managers will decide whether a distribution is to be made based on various factors, including dividend and/or interest income and/or capital gains derived from the underlying investments of the relevant Sub-Fund. If income and dividends generated from the underlying investments of a Sub-Fund are insufficient to fund a distribution for that Sub-Fund, the Managers may in their discretion, with the consent of the Trustee, determine that such distributions should be paid from the capital of that Sub-Fund. Holders may elect for all (but not part) of the distributions to be received for Units of any Sub-Fund to be automatically reinvested in the purchase of additional Units in that Sub-Fund.

Currently, the Managers may make distributions in accordance with the relevant distribution policies for the Classes of the Sub-Funds set out in the table below:

Sub-Fund	Class	Distribution policy
Singapore Dividend Equity Fund	SGD USD	Monthly distributions of between 5% to 7% per annum of the NAV per Unit
	JPY	Monthly distributions of JPY 4 per 1,000 Units
Nikko AM Global Dividend Equity Fund	SGD SGD Hedged (Dist) USD (Dist) CNH Hedged (Dist) CNH	Monthly distributions of between 3% to 7% per annum of the NAV per Unit

- 30.4 For the avoidance of any doubt, the Managers currently do not intend to make any distributions to Holders of the SGD Hedged (Acc) Class and the USD (Acc) Class of the Nikko AM Global Dividend Equity Fund. The dividend and/or interest income and/or capital gains derived from the investments of the Sub-Fund that are attributable to each of these Classes will be accumulated as part of the assets of the Sub-Fund that are attributable to the relevant Class instead.

For the avoidance of any doubt, no performance fee is currently charged in respect of any of the Sub-Funds.

IX RISKS

33.1 The general risks of investing in the Sub-Funds are as follows:

- (a) while the Managers believe that each Sub-Fund offers potential for capital appreciation, there is no assurance that this objective will be achieved. You should read this Prospectus and discuss all risks with your financial and legal advisers before making an investment decision; and
- (b) you should be aware that the price of Units can go down as well as up and that past performance of a Sub-Fund is not necessarily a guide to the future performance of that Sub-Fund. You may not get back your original investment. Investment in the Sub-Funds is designed to produce returns over the long term and is not suitable for short term speculation.

33.2 The risks specific to investing in the Sub-Funds are as follows:

- (a) Market Risk

The price of the securities comprised in the portfolio of each Sub-Fund and its Units, and the income from them, may be influenced by political and economic conditions, changes in interest rates, the earnings of the corporations whose securities are comprised in the portfolio, and the market's perception of the securities.

- (b) Foreign Currency Risk

As the assets of the Horizon Global Bond Fund (S\$ Hedged) will be directly invested in the shares of the Underlying Fund (which are denominated in USD, you should be aware that since the Horizon Global Bond Fund (S\$ Hedged) is denominated in SGD, any appreciation of the SGD against the USD would have a negative effect on the value of the Units of the Horizon Global Bond Fund (S\$ Hedged). This foreign exchange risk is however mitigated in the Horizon Global Bond Fund (S\$ Hedged).

For the Nikko AM Global Dividend Equity Fund, its investments are denominated in various currencies. Fluctuations of the exchange rates of these currencies against the

currency of denomination of each of the Classes of the Sub-Fund may affect the value of the Units of the relevant Class. The Classes may therefore be exposed to currency risk. However, for the SGD Hedged (Acc) Class Units, the SGD Hedged (Dist) Class Units and the CNH Hedged (Dist) Class Units, the Managers intend to hedge the currency exposure of the assets of the Sub-Fund that are attributable to each of these Classes to the relevant currency in which they are each denominated using currency forwards, against the currency denomination of the Sub-Fund. The hedging of the currency exposure will be conducted on a monthly basis. Therefore, you should note that the NAV per Unit of each of the SGD Hedged (Acc) Class, the SGD Hedged (Dist) Class and the CNH Hedged (Dist) Class will take into account any gains or losses arising from the use of the currency forwards in respect of the SGD Hedged (Acc) Class, the SGD Hedged (Dist) Class and the CNH Hedged (Dist) Class respectively.

Save for the Horizon Global Bond Fund (S\$ Hedged) and the SGD Hedged (Acc) Class Units, the SGD Hedged (Dist) Class Units and the CNH Hedged (Dist) Class Units of the Nikko AM Global Dividend Equity Fund, the Managers do not actively hedge the foreign currency exposure of investments in any of the Sub-Funds or Classes and therefore, investors in the relevant Sub-Funds or Classes will be exposed to exchange rate risks.

(c) Liquidity Risk

The extent of market liquidity depends on the size and state of the markets and therefore affects the Sub-Funds' and/or the Underlying Fund's ability to acquire or dispose of assets at the price and time they so desire. Securities listed on the smaller emerging markets are generally less liquid in comparison to those listed on more developed markets and may therefore affect the relevant Sub-Fund's and/or Underlying Fund's ability to acquire or dispose of securities at the price and time desired. There may also be state regulations governing the outward remittance by foreign investors of their share of net profits and dividends and the repatriation of their investments in a foreign currency.

In addition, the Sub-Funds are not listed on any stock exchange and there is no ready secondary market for the Units in the Sub-Funds. Holders can only redeem their Units by completing a Realisation Request and forwarding the same to the Managers through their approved distributors. If there is a surge in realisations at any particular time, the Managers may impose a gate on realisations. If that happens, realisation of Units and/or the payment of realisation proceeds may be delayed. In addition, Holders may not realise their Units during any period when realisation is suspended

(d) Emerging Market Risk

Investments in emerging markets securities are generally more volatile than those of developed countries, with the result that the Units may be subject to greater price volatility.

Some emerging markets do not have well-developed or consolidated bodies of securities laws and regulatory frameworks. There may be less public information on companies listed on such markets as compared to other stock markets. The auditing and financial reporting methods used in some emerging markets may differ from internationally recognised standards, and information on the accounts of some companies listed on such markets may not be an accurate reflection of their financial strength.

You would also have to take into account that trading volume in emerging markets may be substantially less than in the world's leading stock markets and may have to be conducted at unfavourable prices. Securities of companies domiciled in emerging markets are less liquid and more volatile than those domiciled in more developed stock markets and this may result in fluctuations in the price of the Units. Emerging markets may not have fully developed custodian and settlement services and therefore investments in such markets are subject to a greater degree of risk.

There may also be state regulations governing the outward remittance by foreign investors of their share of net profits and dividends and the repatriation of their investments in a foreign currency.

(e) Equity Risk

The Sub-Funds may invest in stocks and other equity securities, which are subject to market risks and are in general more volatile than investment-grade fixed income securities. Units in the Sub-Funds investing in equities may therefore be subject to greater price volatility.

(f) Country Specific Risk

The Sub-Funds and/or the Underlying Funds may invest in securities of a limited number of countries. Where a Sub-Fund or an Underlying Fund invests in a few, select countries, it will be exposed to fluctuations in the economies of these countries, and the market, currency, political, social environment and other risks related specifically to these countries, which may affect the market price of its investments in these countries. Exposure to a limited number of countries also increases the potential volatility of the Sub-Fund and/or the Underlying Fund due to the increased concentration risk as they are less diversified compared to exposure to specific regional or global markets.

(g) Interest Rate Risk and Credit Risk

Investments in debt securities are subject to interest rate fluctuations and credit risks, such as risk of default by the issuer, and are subject to adverse changes in general economic conditions, the financial condition of the issuer, or both, or an unanticipated rise in interest rates, which may impair the issuer's ability to make payments of interest and principal, resulting in a possible default by the issuer.

(h) Income distribution

You should note that income of certain Sub-Funds (if any) may be distributed to Holders at the absolute discretion of the Managers. Sources of income for distribution may include dividends and/or interest income and/or capital gains derived from the investments of the relevant Sub-Fund. Such dividends and/or interest income may be adversely affected by events such as but not limited to companies suffering unexpected losses, having lower than expected dividends and adverse exchange rate fluctuations. In addition to distributions to Holders out of distributable income and/or capital gains, the Managers may at their discretion, with the consent of the Trustee, make capital distributions to Holders at such time as they deem fit in accordance with the provisions of the Deed. Where distributions are paid out of capital of the relevant Sub-Fund or Class, the NAV of the relevant Sub-Fund or Class will be reduced and this will be reflected in the Realisation Price of the Units of the relevant Sub-Fund or Class. Holders redeeming their Units may therefore receive an amount less than their initial investment. Such distributions may also result in reduced future returns to Holders.

(i) Risk Associated with the Investment Strategy of the Sub-Funds

The performance of the Horizon Global Bond Fund (S\$ Hedged) is subject to the performance of the Underlying Fund. The Managers have no control over the investment strategy of the manager of the Underlying Fund and hence there is no assurance that the Underlying Fund will yield consistent outperformance against its benchmark.

For the Nikko AM Global Dividend Equity Fund, the Managers' ability to make any distribution payout in respect of the SGD Class, the SGD Hedged (Dist) Class, the USD (Dist) Class, the CNH Hedged (Dist) Class and the CNH Class largely depends on the successful execution of the investment strategy of the Sub-Fund. The distributions are particularly sensitive to the dividend yield and capital gains/losses from the Sub-Fund's investments in equities.

For the Singapore Dividend Equity Fund, the Managers' ability to make any distribution payout largely depends on the successful execution of the investment strategy of the Sub-Fund. The distributions are particularly sensitive to the dividend yield and capital gains/losses from the Sub-Fund's investments in equities.

For the Horizon Singapore Fixed Income Enhanced Fund, the primary risks associated with the Sub-Fund's investment strategy are interest rate risk and credit risk.

33.3 The risks specific to the investments of the Horizon Global Bond Fund (S\$ Hedged) in the Underlying Fund are as follows:

The following are the principal risks which may affect the Underlying Fund but the list is not exhaustive:

(a) Investment Risks

Past performance is not necessarily a guide to the future. The price of shares in the Underlying Fund ("**Shares**") and the income from them may fall as well as rise and an investor may not recover the full amount invested. There is no assurance that the Underlying Fund will achieve its investment objective or that a holder of Shares ("**Shareholder**") will recover the full amount invested in the Underlying Fund. As the capital return and income of the Underlying Fund are based on the capital appreciation and income on the securities it holds (less expenses incurred), the Underlying Fund's return may be expected to fluctuate in response to changes in such capital appreciation or income.

(b) Default and Liquidity Risk of Below Investment Grade Debt Securities

Below investment grade debt securities are speculative and involve a greater risk of default and price changes due to changes in the issuer's creditworthiness. The market prices of these debt securities fluctuate more than investment grade debt securities and may decline significantly in periods of general economic difficulty. The market for such securities may not be liquid at all times. In a relatively illiquid market the Underlying Fund may not be able to acquire or dispose of such securities quickly and as such the Underlying Fund may experience adverse price movements upon liquidation of its investments. Settlement of transactions may be subject to delay and administrative uncertainties.

(c) Political Risks

The value of the RIC's assets may be affected by uncertainties such as political developments, changes in government policies, taxation, currency repatriation

restrictions and restrictions on foreign investment in some of the countries in which the RIC may invest.

(d) Currency Risks

The investments of the Underlying Fund may be acquired in a wide range of currencies and changes in exchange rates between currencies may cause the value of an investment in the Underlying Fund to fluctuate. The RIC may use hedging, cross-hedging and other techniques and instruments in the Underlying Fund within the limits laid down, from time to time, by the Central Bank¹⁰.

(e) Foreign Exchange Transaction Risk

The Underlying Fund may use foreign exchange contracts to alter the currency exposure characteristics of transferable securities it holds. Consequently it is possible that the performance of the Underlying Fund may be strongly influenced by movements in foreign exchange rates because the currency position held by the Underlying Fund may not correspond with the securities position.

(f) Counterparty and Settlement Risks

The RIC will be exposed to a credit risk on parties with whom it trades and will also bear the risk of settlement default.

(g) Custody Risks

As the RIC may invest in markets where custodial and/or settlement systems are not fully developed, the assets of the RIC which are traded in such markets and which have been entrusted to sub-custodians in circumstances where the use of sub-custodians is necessary may be exposed to risk in circumstances where the custodian of the RIC and trustee of the RIC will have no liability.

(h) Umbrella structure of the RIC and Cross Liability Risk

The Underlying Fund will be responsible for paying its fees and expenses regardless of the level of its profitability. The RIC is an umbrella fund with segregated liability between its sub-funds (each a "**RIC Sub-Fund**" and collectively, the "**RIC Sub-Funds**"). Under Irish law the RIC generally will not be liable as a whole to third parties and there generally will not be the potential for cross liability between the RIC Sub-Funds. Notwithstanding the foregoing, there is no assurance that, should an action be brought against the RIC in the courts of another jurisdiction, the segregated nature of the RIC Sub-Funds would necessarily be upheld.

(i) Risks associated with FDIs

The Underlying Fund may use or invest in FDIs for efficient portfolio management and/or investment purposes. The types of FDIs that may be used by the Underlying Fund include futures, forwards, swaps, spot foreign exchange transactions, caps and floors, contracts for differences and credit derivatives. While the prudent use of FDIs can be beneficial, FDIs also involve risks different from, and in certain cases greater than, the risks presented by more traditional investments. The Underlying Fund may enter into transactions in over-the-counter ("**OTC**") markets that expose it to the credit of its counterparties and their ability to satisfy the terms of such contracts. Where the Underlying Fund enters into credit default swaps and other swap

¹⁰ "**Central Bank**" means the Central Bank of Ireland and any successor regulatory authority with responsibility for the authorisation and supervision of the RIC.

arrangements and derivative techniques, it will be exposed to the risk that the counterparty may default on its obligations to perform under the relevant contract. If a counterparty becomes bankrupt or insolvent, the Underlying Fund could experience delays in liquidating the position and may incur significant losses. It is also possible that ongoing derivative transactions will be terminated unexpectedly as a result of events outside the control of the RIC, for instance, bankruptcy, supervening illegality or a change in the tax or accounting laws relative to those transactions at the time the agreement was originated.

Since many FDIs have a leverage component, adverse changes in the value or level of the underlying asset, rate or index can result in a loss substantially greater than the amount invested in the derivative itself. Certain FDIs have the potential for unlimited loss regardless of the size of the initial investment. If there is a default by the other party to any such transaction, there will be contractual remedies; however, exercising such contractual rights may involve delays or costs which could result in the value of the total assets of the related portfolio being less than if the transaction had not been entered. The swap market has grown substantially in recent years with a large number of banks and investment banking firms acting both as principals and as agents utilising standardised swap documentation. As a result, the swap market has become liquid but there is no assurance that a liquid secondary market will exist at any specified time for any particular swap. Derivatives do not always perfectly or even highly correlate or track the value of the securities, rates or indices they are designed to track. Consequently, the RIC's use of derivative techniques may not always be an effective means of, and sometimes could be counter-productive to, the RIC's investment objective. An adverse price movement in a derivative position may require cash payments of variation margin by the RIC that might in turn require, if there is insufficient cash available in the portfolio, the sale of the RIC's investments under disadvantageous conditions. Also, there are legal risks involved in using FDIs which may result in loss due to the unexpected application of a law or regulation or because contracts are not legally enforceable or documented correctly.

Collateral or margin may be passed by or on behalf of the Underlying Fund to a counterparty or broker in respect of OTC derivative transactions. Assets deposited as collateral or margin with brokers may not be held in segregated accounts by the brokers and may therefore become available to the creditors of such brokers if such brokers become insolvent or bankrupt.

Limitations on the use of FDIs

The Underlying Fund's global exposure (as prescribed in the UCITS¹¹ notices) relating to FDIs must not exceed its total NAV.

Position exposure to the underlying assets of FDIs, including embedded FDIs in transferable securities or money market instruments, when combined where relevant with positions resulting from direct investments, may not exceed the investment limits set out in the UCITS notices. (This provision does not apply in the case of index based FDIs provided the underlying index is one which meets with the criteria set out in the UCITS notices.)

¹¹"UCITS" means an undertaking for collective investment in transferable securities established pursuant to the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 as such may be further amended, supplemented or replaced from time to time and any rules made by the Central Bank pursuant to them.

The Underlying Fund may invest in FDIs dealt in over-the-counter provided that:

- The counterparties to OTC transactions are institutions subject to prudential supervision and belonging to categories approved by the Central Bank.
- Investment in FDIs are subject to the conditions and limits laid down by the Central Bank.

(j) Risks associated with Futures and Options

The Underlying Fund may from time to time use both exchange-traded and over the counter futures and options as part of its investment policy or for hedging purposes. These instruments are highly volatile, involve certain special risks and expose investors to a high risk of loss. The low initial margin deposits normally required to establish a futures position permit a high degree of leverage. As a result, a relatively small movement in the price of a futures contract may result in a profit or a loss which is high in proportion to the amount of funds actually placed as initial margin and may result in un-quantifiable further loss exceeding any margin deposited. Further, when used for hedging purposes there may be an imperfect correlation between these instruments and the investments or market sectors being hedged. Transactions in OTC derivatives may involve additional risk as there is no exchange or market on which to close out an open position. It may be impossible to liquidate an existing position, to assess or value a position or to assess the exposure to risk.

(k) Risks associated with investment in other collective investment schemes

The Underlying Fund may invest in one or more collective investment schemes including schemes managed by RIIL and/or affiliates of RIIL. Non-Irish domiciled collective investment schemes may not provide a level of investor protection equivalent to that provided by collective investment schemes authorised by the Central Bank. As a shareholder of another collective investment scheme, the Underlying Fund would bear, along with other shareholders, its *pro rata* portion of the expenses of the other collective investment scheme, including management and/or other fees. These fees would be in addition to the management fees and other expenses which the Underlying Fund bears directly in connection with its own operations.

(l) Emerging Market Risk

A portion of the assets of the Underlying Fund may be invested in Emerging Markets¹². The risks involved in Emerging Market investment are likely to exceed the risks of investment in more mature markets. This higher degree of risk may be associated with: the adverse effect on investment sentiment which could result from military conflict, civil commotion, nationalisation of foreign-held assets or other unfavourable political developments such as indirect expropriation through high taxation; the difficulty of obtaining an accurate view of a company's prospects where accounting standards are such that those prospects are not fairly reflected by published accounts; the difficulty of selling, or selling at a fair price, securities in which an efficient market is not made; potential difficulties in obtaining prompt settlement and the possibility that a local currency might cease to be readily convertible into any major freely-negotiable trading currency. In some Emerging Markets there may be foreign ownership restrictions which may restrict the ability of the Underlying Fund to secure some corporate action entitlements (including rights issues). In addition, the Underlying

¹² "Emerging Markets" means markets that are typically those of poorer or less developed countries which exhibit lower levels of economic and/or capital market development, and higher levels of share price and currency volatility.

Fund may face significant registration, settlement and custody risks in purchasing and selling securities in Emerging Markets.

(m) Charging of Fees and Expenses to Capital rather than Income

The Underlying Fund seeks to generate income in addition to capital growth and in order to increase the amount of income that can be distributed all of the fees and expenses of the Underlying Fund may be charged to its capital. There is an increased risk that on the repurchase of shares of the Underlying Fund, the Horizon Global Bond Fund (S\$ Hedged) may not receive back the full amount invested. In particular, as the Underlying Fund invests predominantly in debt instruments, this expense policy means that there is a greater risk of capital erosion for the Underlying Fund given the lack of potential for capital growth and the value of future returns may be diminished as a result of capital erosion.

(n) Fixed Income Risk

Investment in fixed income securities is subject to interest rate, sector, security and credit risks. Lower-rated securities will usually offer higher yields than higher-rated securities to compensate for the reduced creditworthiness and increased risk of default that these securities carry. Lower-rated securities generally tend to reflect short-term corporate and market developments to a greater extent than higher-rated securities which respond primarily to fluctuations in the general level of interest rates. There are fewer investors in lower-rated securities and it may be harder to buy and sell such securities at an optimum time. The volume of transactions effected in certain international bond markets may be appreciably below that of the world's largest markets, such as the United States. Accordingly, the Underlying Fund's investment in such markets may be less liquid and their prices may be more volatile than comparable investments in securities trading in markets with larger trading volumes. Moreover, the settlement periods in certain markets may be longer than in others which may affect portfolio liquidity. Investment grade securities may be subject to the risk of being downgraded to a rating that is below investment grade. Where investment grade securities are downgraded to a rating that is below investment grade after acquisition, there is no specific requirement to sell such securities unless otherwise stated in the investment policy outlined of the Underlying Fund. If there is such a downgrading, RIII or its delegates will promptly analyse such securities and the financials of the issuer of such securities to determine the action to be taken (i.e. hold, reduce or buy).

Many fixed income securities especially those issued at high interest rates provide that the issuer may repay them early. Issuers often exercise this right when interest rates decline. Accordingly, holders of securities that are pre-paid may not benefit fully from the increase in value that other fixed income securities experience when rates decline. Furthermore, in such a scenario the Underlying Fund may re-invest the proceeds of the pay-off at the then current yields, which will be lower than those paid by the security that was paid off. Pre-payments may cause losses on securities purchased at a premium, and unscheduled pre-payments, which will be made at par, will cause the Underlying Fund to experience loss equal to any unamortized premium.

An investment in sovereign debt securities, including, but not limited to, those issued by sovereign / government bodies of countries in the Eurozone, may be subject to credit and / or default risks. Particularly high (or increasing) levels of government fiscal deficit and / or high levels of government debts, amongst other factors, may adversely affect the credit rating of such sovereign debt securities and may lead to market concerns of

higher default risk. In the unlikely event of downgrading or default, the value of such securities may be adversely affected resulting in the loss of some or all of the sums invested in such securities.

(o) Eurozone Crisis

It is possible that a country may leave the Eurozone and return to a national currency, and as a result may leave the EU and/or that the euro, the European single currency, will cease to exist in its current form and/or lose its legal status in one or more countries in which it currently has such status. The effect of such potential events on the Underlying Fund's portfolio holdings, particularly those holdings which are denominated in euro or which are predominantly tied to Europe, is impossible to predict.

(p) Dilution Adjustment on the NAV per Share

The actual cost of purchasing and selling the underlying investment in the Underlying Fund may be higher or lower than the last traded price used in calculating the NAV per share. The effect of dealing charges, commissions and dealing at prices other than the last traded price may have a materially disadvantageous effect on the interest of the Shareholders of the Underlying Fund. To prevent this effect, known as "dilution" and to protect Shareholders, the RIC may use swing pricing (i.e. the RIC may charge a dilution adjustment when there are net inflows into the Underlying Fund or net outflows from the Underlying Fund, so that the price of a share in the Underlying Fund is above or below that which would have been resulted from a valuation based on the last traded price). The charging of a dilution adjustment may either reduce the repurchase price or increase the subscription price of the shares in the Underlying Fund. Where a dilution adjustment is made, it will increase the NAV per share where the Underlying Fund receives net subscriptions and will reduce the NAV per share where the Underlying Fund receives net repurchases.

The imposition of a dilution adjustment will depend on the value of subscriptions or redemptions of shares of the Underlying Fund on any dealing day of the Underlying Fund.

RIC may make a dilution adjustment:

- (i) if net subscriptions or redemptions (excluding in specie transfers) exceed certain pre-determined percentage thresholds relating to the Underlying Fund's NAV (where such percentage thresholds have been predetermined for the Underlying Fund from time to time by the directors or a committee nominated by the directors of RIC); or
- (ii) where the Underlying Fund is in a continual decline (i.e. is suffering a net outflow of investments); or
- (iii) in any other case where RIL reasonably believes that it is in the interests of shareholders of the Underlying Fund to impose a dilution adjustment.

The dilution adjustment for the Underlying Fund will be calculated by reference to the typical costs of dealing in the underlying investments of the Underlying Fund, including any dealing spreads, market impact, commissions, fees and taxes. These costs can vary over time and as a result the amount of dilution adjustment will also vary over time. The price of each class of shares in the Underlying Fund will be calculated separately but any dilution adjustment will affect the price of shares of each class in the Underlying

Fund in an identical manner. When the dilution adjustment is not made and shares are bought or sold there may be an adverse impact on the NAV of the Underlying Fund. Therefore, the objective of swing pricing is to counter a potential dilution of the Underlying Fund's NAV caused by trading costs resulting from material subscription and/or redemption activity in the Underlying Fund.

Any in specie subscriptions or redemptions will not be taken into account when determining whether there are net inflows or outflows from the Underlying Fund. Shareholders of the Underlying Fund subscribing or redeeming in specie will do so at the prevailing NAV per share, without a dilution adjustment applied. However, in the case of the Underlying Fund which may suffer stamp duty costs as a result of an in specie subscription a dilution adjustment may be applied sufficient to reflect the cost of the stamp duty charges incurred as a result of the in specie subscription.

Dilution adjustments may be applied on any dealing day of the Underlying Fund but the possible amount of such adjustments will be reviewed from time to time by RIIL.

You should note that the RIC adopts a partial swing method. This means that the NAV per share of the Underlying Fund will only be "swung" upwards on days when the net inflows into the Underlying Fund exceed a pre-determined percentage threshold and "swung" downwards on days when the net outflows from the Underlying Fund exceed a pre-determined percentage threshold.

As at 30 June 2018, the subscription swing factor and the redemption swing factor of the Underlying Fund are as follows:

Name of Underlying Fund	Subscription swing factor	Redemption swing factor
Russell Investments Global Bond Fund	10 basis points	10 basis points

You may obtain supplementary information relating to the risk management methods employed by the Underlying Fund, including the quantitative limits that are applied and any recent developments in the risk and yield characteristics of the main categories of investments of the Underlying Fund, upon request to the Managers.

33.4 Financial Derivatives Risk of the Sub-Funds

- (a) The Managers may in their absolute discretion, invest in FDIs including, but not limited to, options on securities, forward contracts, over-the counter options, interest rate swaps and swaptions, credit default swaps and swaptions, index futures and options, futures or options of any kind of financial instrument or structured notes such as credit-linked notes, equity-linked notes and index-linked notes for the purposes of hedging, efficient portfolio management and/or optimising returns. The Managers may make use of financial derivatives as allowed in the Code and (in the case of the Singapore Dividend Equity Fund only and for so long as it is a Qualifying CIS) in Part II of the Standards of Qualifying CIS. The Managers may invest in FDIs for the purposes of hedging existing positions in a portfolio, where there is a strong correlation to the underlying investments or tactical asset allocation or efficient portfolio management. FDIs shall not be used to gear the overall portfolio. Each Sub-Fund may net its OTC financial derivative positions.
- (b) Where FDIs are used by any Sub-Fund, the global exposure of the relevant Sub-Fund to financial derivatives or embedded financial derivatives will not exceed (in the case of all the Sub-Funds except for the Singapore Dividend Equity Fund) 100% and (in the case of the Singapore Dividend Equity Fund) 20% of the NAV of that Sub-Fund at all

times. Such exposure would be calculated using the Commitment Approach as described in Appendix 1 – Investment: Core Requirements of the Code and (in the case of the Singapore Dividend Equity Fund only and for so long as it is a Qualifying CIS) in the Appendix to the Standards of Qualifying CIS.

- (c) The risks associated with the Sub-Funds' use of FDIs are as follows:

While the prudent and judicious use of derivatives by investment professionals can be beneficial, derivatives involve risks different from, and in some cases, greater than, the risks presented by more traditional investments. Some of the risks associated with derivatives are market risk, management risk, credit risk, liquidity risk, moratorium risk, capital control risk, tax risk and leverage risk. The Managers have the necessary expertise and controls for investments in derivatives and have in place systems to monitor the derivative positions for the Sub-Funds, if any.

The viability of exercising derivative instruments depends on the market price of the investments to which they relate, and accordingly, the Managers may from time to time decide that it is not viable to exercise certain derivatives held by the Sub-Funds within the prescribed period, in which case, any costs incurred in obtaining the derivatives will not be recoverable. Additionally, the market price of the relevant investment may not exceed the exercise price attached to the derivative instrument at any time during the exercise period or at the time at which the warrants or options are exercised and if this happens, this may result in an immediate loss to the relevant Sub-Fund.

Each Sub-Fund may invest into underlying funds which use or invest in FDIs, and it is possible that the relevant Sub-Fund's NAV may be subject to volatility due to that Sub-Fund's and/or the relevant underlying funds' usage or investment in FDIs.

- (d) The Managers will ensure that the risk management and compliance procedures and controls adopted are adequate and have been or will be implemented and that they have the necessary expertise to control and manage the risks relating to the use of financial derivatives.

The above is not an exhaustive list of the risks which you should consider before investing in the Sub-Funds. You should be aware that an investment in any Sub-Fund may be exposed to other risks of an exceptional nature from time to time.

X SUBSCRIPTION OF UNITS

However, the Managers may levy a charge for providing you with a copy of the Deed or supplemental deed.

34.3 Applications through the internet

The Relevant Participating Distributors (as defined below) may offer Units through the internet. By making an electronic online application for the subscription of Units through the website of any distributor in Singapore which the Managers may, after giving notice to the Trustee, appoint for the purpose of this paragraph (the “**Relevant Participating Distributor**”) (as the case may be), or by an application form printed from such a website, you confirm:

During any period when the realisation of Units is suspended pursuant to paragraph 48.1, the application for subscription of Units through the internet will also be suspended. Any charges to be imposed by the Managers or the Relevant Participating Distributor in connection with any application for the subscription or realisation of Units through the internet will be borne by you and such charges shall not be taken out of the Deposited Property or form part of the Initial Sales Charge. The Managers will provide you with hardcopies of this Prospectus, the Deed and any supplemental deed for the time being in force upon your request. However, the Managers may levy a charge for providing you with a copy of the Deed or supplemental deed.

34.4 Notwithstanding receipt of the application forms, the Managers shall retain the absolute discretion to accept or reject any application for Units in accordance with the provisions of the Deed. If an application for Units is rejected by the Managers, the application monies shall be refunded (without interest) to you, the relevant Approved Bank / Relevant Participating Bank or the SRS Account operator (as the case may be) within a reasonable time in such manner as the Managers or the relevant approved distributor shall determine. No certificates will be issued by the Managers.

34.6 If the Managers decide to establish a RSP for any Class (other than those described in paragraph 39 as being available for subscription by RSP), the Managers may change the

minimum initial investment for that Class (as set out in paragraph 34.5) to such amount as the Managers may determine.

- 34.7 The initial offer period for the SGD Class of the Nikko AM Global Dividend Equity Fund will be for such period or at such time as the Managers may decide from time to time upon prior notification to the Trustee and as at the date of registration of this Prospectus, the initial offer period is expected to be within the next 6 to 12 months. During the initial offer period, the RMB Class Units of each such Sub-Fund and the CNH Class Units of the Nikko AM Global Dividend Equity Fund will be offered at the initial issue price of RMB 5.000 per Unit.
- 34.10 The Managers reserve the right not to proceed with the launch of the SGD Class of the Nikko AM Global Dividend Equity Fund if:
- (i) the capital raised for the SGD Class of the Nikko AM Global Dividend Equity Fund as at the close of its initial offer period is less than S\$5,000,000 or its equivalent; or
 - (ii) the Managers are of the view that it is not in the interest of the investors or it is not commercially viable to proceed with the SGD Class of the Nikko AM Global Dividend Equity Fund.

In such event, the Managers may at their discretion declare the SGD Class of the Nikko AM Global Dividend Equity Fund to be deemed not to have commenced, and shall notify the relevant investors of the same and return the subscription monies received (without interest) to the relevant investors no later than 30 Business Days after the close of the initial offer period for the SGD Class of the Nikko AM Global Dividend Equity Fund.

- 34.11 The Managers reserve the right not to proceed with the launch of the USD (Dist) Class of the Nikko AM Global Dividend Equity Fund if:
- (i) the capital raised for the USD (Dist) Class of the Nikko AM Global Dividend Equity Fund as at the close of its initial offer period is less than S\$5,000,000 or its equivalent; or
 - (ii) the Managers are of the view that it is not in the interest of the investors or it is not commercially viable to proceed with the USD (Dist) Class of the Nikko AM Global Dividend Equity Fund.

In such event, the Managers may at their discretion declare the USD (Dist) Class of the Nikko AM Global Dividend Equity Fund to be deemed not to have commenced, and shall notify the relevant investors of the same and return the subscription monies received (without interest) to the relevant investors no later than 30 Business Days after the close of the initial offer period for the USD (Dist) Class of the Nikko AM Global Dividend Equity Fund.

34.12 The Managers reserve the right not to proceed with the launch of the RMB Class of any Sub-Fund (except for the Nikko AM Global Dividend Equity Fund) or the CNH Class of the Nikko AM Global Dividend Equity Fund if:

- (i) the capital raised for the relevant RMB Class or the CNH Class as at the close of its initial offer period is less than SGD 10 million or its equivalent; or
- (ii) the Managers are of the view that it is not in the interest of the investors or it is not commercially viable to proceed with the relevant RMB Class or the CNH Class.

In such event, the Managers may at their discretion declare the relevant RMB Class or the CNH Class to be deemed not to have commenced, and shall notify the relevant investors of the same and return the subscription monies received (without interest) to the relevant investors no later than 30 Business Days after the close of the initial offer period for the relevant RMB Class or the CNH Class.

34.13 Each of the USD Class of the Horizon Global Bond Fund (S\$ Hedged) and the USD Class of the Horizon Singapore Fixed Income Enhanced Fund has been fully redeemed. In the future, Units of each of these Classes may be offered for a period (the "**Offer Period**") at the issue price of US\$1.000 per Unit. After the Offer Period, the issue price of Units of that Class will be calculated based on forward pricing and determined based on the Value of the Units of such Class as set out in paragraph 35.1 below.

35.1 The Issue Price of the Units of a Sub-Fund or Class is calculated based on forward pricing and is determined based on the Value of the Units of the Sub-Fund or Class at 7 a.m. Singapore time on the Business Day¹⁴ immediately following the relevant Dealing Day¹⁵ on which the application for Units of the Sub-Fund or Class is received. The dealing deadline for each Sub-Fund is, in relation to any Dealing Day, currently 5 p.m. on the said Dealing Day but this may be changed subsequently to any other time of the day by the Managers with the approval of the Trustee (the "**Dealing Deadline**"). This means that if an application is received and accepted by the Managers through their approved distributor(s) by the Dealing Deadline on the Dealing Day, the price will be based on the Value of the Sub-Fund or Class for that Dealing Day. If an application is received and accepted by the Managers through their approved distributor(s) after the Dealing Deadline on that Dealing Day, it shall be deemed to be received and accepted by the Managers through their approved distributor(s) only on the immediately following Dealing Day. This Issue Price will be determined only on the Business Day following the Dealing Day.

¹⁴ "**Business Day**" (in relation to any of the Sub-Funds or Classes except for the CNH Hedged (Dist) Class of the Nikko AM Global Dividend Equity Fund) means any day (other than a Saturday or a Sunday) on which commercial banks in Singapore and the Singapore Exchange Securities Trading Limited are open for business and (in relation to the CNH Hedged (Dist) Class of the Nikko AM Global Dividend Equity Fund) means any day (other than a Saturday or a Sunday) on which commercial banks in Singapore and Hong Kong and the Singapore Exchange Securities Trading Limited are open for business.

¹⁵ "**Dealing Day**" in relation to the subscription and realisation of Units means a Business Day or such other day as provided in the Deed.

- 35.2 The following is an illustration of the number of Units that you will receive based on an investment amount of \$1,000 and a notional Issue Price¹⁵ of \$1.000 (the actual Issue Price of the Units of a Class of a Sub-Fund will fluctuate according to the Value of the relevant Class):

\$1,000	- \$50	= \$950	÷ \$1.000**	= 950 Units
Gross Investment Sum	Initial Sales Charge* (5.00%)	Net Investment Sum	Issue Price (i.e. NAV per Unit)	Number of Units

- 35.3 The Managers may from time to time give a discount or discounts on the Initial Sales Charge payable by prospective investors in accordance with the provisions of the Deed. Such discounts would be deducted from the amount of the Initial Sales Charge payable by the investors. The Managers reserve the right to differentiate between applicants as to the quantum of discount or discounts given to them.
36. If your application is successful, a confirmation of your purchase will be sent to you within 7 Business Days of the Managers' receipt of your application.
- 37.1 The Managers shall have the exclusive right to effect the creation and issue of Units for the account of any Sub-Fund or Class and the acceptance and non-acceptance of any initial or subsequent application for Units in any Sub-Fund or Class shall be at the absolute discretion of the Managers, acting in consultation with the Trustee. However, a new investor¹⁶ may cancel his subscription of Units by sending (by post or by hand) a cancellation request to the Managers through the approved distributor(s) from whom he purchased his Units within 7 calendar days of the date on which he signed the subscription agreement or such other longer period as may be agreed between the Managers and the Trustee or as the Authority may prescribe (the "**Cancellation Period**"). A cancellation request form is included with the application form for the subscription of Units, or may be obtained from the approved distributors. Where the last day of

¹⁵ You should note that the Issue Price of Units of the Horizon Global Bond Fund (S\$ Hedged) may be calculated based on the "swing" price of the Underlying Fund. Please refer to paragraph 33.3(p) for more information on the swing pricing used by the Underlying Fund.

¹⁶ A "**new investor**" is an investor who:

- (i) is an individual;
- (ii) is not an existing Holder who is purporting to cancel a subsequent subscription made after the Cancellation Period applicable to his first subscription;
- (iii) is not an existing Holder participating in a Regular Savings Plan of the relevant Sub-Fund and effecting a second or any subsequent payment towards the Regular Savings Plan;
- (iv) has not previously switched, converted or exchanged his units in any other fund managed by the Managers to Units in the relevant Sub-Fund during the cancellation period applicable to the first-mentioned fund; and
- (v) has not previously converted his Units in any Sub-Fund ("**original Sub-Fund**") to Units in the relevant Sub-Fund during the cancellation period applicable to the original Sub-Fund.

the Cancellation Period falls on a Sunday or a public holiday, the Cancellation Period is deemed to be extended to the next calendar day, not being a Sunday or public holiday. The cancellation proceeds will normally be paid within 7 Business Days after the relevant Dealing Day on which the cancellation request is received.

37.2 The cancellation proceeds payable for the cancellation of a subscription of Units under paragraph 37.1 above will be determined as the lower of:

- (a) the Market Value¹⁷; or
- (b) the Original Subscription Amount¹⁸.

Any excess in the Market Value over the Original Subscription Amount, or in the Original Subscription Amount over the Market Value (as the case may be), will be retained by the relevant Sub-Fund. The Managers are also entitled to deduct from the cancellation proceeds any administrative expenses incurred in cancelling the subscription so long as such expenses are reasonably related to the original purchase and subsequent cancellation of the new investor's Units. A new investor is only entitled to receive his cancellation proceeds arising from the cancellation of his subscription of Units in the same currency as that in which such Units are denominated. Any Initial Sales Charge paid by the investor will be refunded to him. However, he will have to take the risk for any price changes in the NAV of the relevant Sub-Fund or Class since he purchased the Units.

38. Under the provisions of the Deed, the Managers may terminate the Fund in their absolute discretion by notice in writing if the aggregate Value of the Deposited Property of the Fund is less than S\$30,000,000.

XI REGULAR SAVINGS PLAN (RSP)

39. The approved distributors of the Managers may make available a Regular Savings Plan ("**RSP**") for the Classes of Sub-Funds set out in the table below. To participate in a RSP, you must first invest the minimum initial investment of S\$1,000 in the relevant Class. The minimum monthly investment for each Class under the RSP is S\$100. The monthly contribution for the RSP will be deducted from your bank account or SRS Account (where applicable) on the Deduction Date set out in the table below. You should note that no RSP is presently available for the subscription of Units in any of the other Classes of the Sub-Funds.

Sub-Fund	Class	Deduction Date	Allotment of Units
Horizon Global Bond Fund (S\$ Hedged)	SGD	14th of each month (or the next Business Day if that day is not a Business Day)*	**Normally within 2 Business Days after the date on which the monthly contribution is deducted

¹⁷ "**Market Value**" in relation to Units the subscription of which is being cancelled by a new investor means the value of such Units on the relevant Dealing Day calculated as the aggregate of (a) the total value of such Units based on the Realisation Price on such Dealing Day but without deducting the Realisation Charge (if any) and (b) the total Initial Sales Charge paid for such Units.

¹⁸ "**Original Subscription Amount**" in relation to Units the subscription of which is being cancelled by a new investor means the total amount (including the total Initial Sales Charge) paid by the new investor for the subscription of those Units.

Nikko AM Global Dividend Equity Fund	SGD SGD Hedged (Acc) SGD Hedged (Dist)	14th of each month (or the next Business Day if that day is not a Business Day)*	**Normally within 2 Business Days after the date on which the monthly contribution is deducted
Singapore Dividend Equity Fund	SGD	14th of each month (or the next Business Day if that day is not a Business Day)*	**Normally within 2 Business Days after the date on which the monthly contribution is deducted
Horizon Singapore Fixed Income Enhanced Fund	SGD	14th of each month (or the next Business Day if that day is not a Business Day)*	**Normally within 2 Business Days after the date on which the monthly contribution is deducted

* or such other date as determined by the Managers from time to time

** This may be exceeded in the case of Units purchased through the Managers' approved distributors or where Units are purchased using SRS monies.

40. You may cease your participation in the RSP, without suffering any penalty, by giving the approved distributor from whom you purchased your Units 30 days' prior notice in writing but the Managers reserve the right to compulsorily realise your Units if your holdings are below the Minimum Holding for the relevant Sub-Fund or Class.

XII REALISATION OF UNITS

41. How to sell Units

- 41.1 A Holder may redeem Units by completing the Realisation Request (or such other form as the Managers may approve from time to time) and forwarding the same to the Managers through the approved distributor(s) from whom he purchased the Units. Institutional investors who had purchased their Units directly from the Managers may redeem their Units by completing the Realisation Request and forwarding the same to the Managers.

A Holder may also make an electronic online application for the realisation of Units on or through the website of the Relevant Participating Distributor or on an application form printed from such website.

- 41.2 The net realisation proceeds are calculated by multiplying the number of Units of the Sub-Fund or Class to be realised by the Realisation Price of the Units of such Sub-Fund or Class. The Realisation Price is calculated based on forward pricing and is determined based on the Value of the Units of such Sub-Fund or Class at 7 a.m. Singapore time on the Business Day immediately following the relevant Dealing Day on which the Realisation Request is received. This means that if an application is received and accepted by the Managers through their

approved distributor(s) by the Dealing Deadline on the Dealing Day, the price will be based on the Value of the Sub-Fund or Class for that Dealing Day. If an application is received and accepted by the Managers through their approved distributor(s) after the Dealing Deadline on that Dealing Day, it shall be deemed to be received and accepted by the Managers through their approved distributor(s) only on the immediately following Dealing Day. This Realisation Price will be determined only on the Business Day following the Dealing Day.

42. Minimum Holding and minimum realisation amount

Sub-Fund	Minimum Holding in relation to each Class of the Sub-Fund	Minimum realisation amount
Horizon Global Bond Fund (S\$ Hedged)	500 Units (or such other number of Units as the Managers may from time to time determine upon giving prior notice to the Trustee in accordance with the Deed)	500 Units for RMB or CNH Classes. Nil for other Classes
Nikko AM Global Dividend Equity Fund		
Singapore Dividend Equity Fund***		
Horizon Singapore Fixed Income Enhanced Fund		

***There is currently no Minimum Holding for the JPY Class of the Singapore Dividend Equity Fund.

43.1 The following is an illustration of the realisation proceeds that a Holder will receive based on the realisation of 1,000 Units and a notional Realisation Price¹⁹ of \$1.050 (the actual Realisation Price of the Units of a Class will fluctuate according to the Value of the relevant Class of a Sub-Fund):

1000	x	\$1.050	=	\$1,050
Units to be Realised		Realisation Price (i.e. NAV per Unit)*		Realisation Proceeds
* The Realisation Price for each of the Classes except the JPY Class of the Singapore Dividend Equity Fund is currently rounded to the nearest three decimal places and for the JPY Class of the Singapore Dividend Equity Fund is currently rounded to the nearest four decimal places.				

43.2 The Realisation Price excludes the Realisation Charge. Currently, there is no Realisation Charge payable, but under the provisions of the Deed, the Managers may impose a Realisation Charge of up to 1%.

44. Payment will be made within 7 Business Days after the relevant Dealing Day on which the Realisation Request is received subject to the provisions of the Deed.

For Units purchased with cash, the net realisation proceeds shall be paid to the Holder. For Units purchased with CPF monies (where applicable), the net realisation proceeds shall be paid to the Holder's CPF agent bank or credited to his CPF special account, as the case may be. For Units purchased with SRS monies, the net realisation proceeds shall be paid to the relevant

¹⁹ You should note that the Realisation Price of Units of the Horizon Global Bond Fund (S\$ Hedged) may be calculated based on the "swing" price of the Underlying Fund. Please refer to paragraph 33.3(p) for more information on the swing pricing used by the Underlying Fund.

bank for credit of the Holder's SRS Account or otherwise in accordance with the provisions of any applicable laws, regulations or guidelines.

XIII EXCHANGE OF UNITS WITHIN GROUP TRUST

45. The Managers may, at their discretion and on such terms and conditions as they may impose (including the levying of fees or charges), on the application of a Holder, effect the exchange of Units of any Sub-Fund for units of any other Group Trust (referred to as "**units**") and on notification by the managers of a Group Trust of an application by the holder of units in that Group Trust, exchange such units for Units. The following provisions will apply to such an exchange:

- (a) the exchange of Units for units is exercised by a Holder giving to the Managers through the approved distributor(s) from whom he purchased the Units a notice in such form as the approved distributor may from time to time require and accompanied by a duly completed and executed application form for the subscription of units in the relevant Group Trust. Institutional investors who had purchased their Units directly from the Managers may exchange their Units by giving to the Managers a notice in such form as the Managers may from time to time require and accompanied by a duly completed and executed application form for the subscription of units in the relevant Group Trust;
- (b) unless permitted otherwise by the Managers at their absolute discretion, no exchange is permitted between Units of any Sub-Fund and units of any Group Trust which are denominated in different currencies;
- (c) the exchange of Units for units specified in the relevant notice (the "**Exchange Notice**") will be made on the Common Exchange Dealing Day on which the Exchange Notice is received by the Managers through their approved distributor(s) up to 5.00 p.m. Singapore time on such Common Exchange Dealing Day. If an Exchange Notice is received after 5.00 p.m. Singapore time on a Common Exchange Dealing Day or on a day that is not a Common Exchange Dealing Day, the Exchange Notice will be treated as having been received before 5.00 p.m. Singapore time on the next Common Exchange Dealing Day. For this purpose, "**Common Exchange Dealing Day**" is a day which is both a Dealing Day in relation to Units and a dealing day (as defined in the relevant trust deed) in relation to units of the Group Trust;
- (d) no Units will be exchanged during any period when the right of Holders to require the realisation of Units is suspended pursuant to the suspension provisions set out in section XVI of this Prospectus or when the issue of units in the Group Trust is suspended pursuant to the suspension provisions set out in the trust deed of the relevant Group Trust;
- (e) a Holder is not entitled, without the consent of the Managers, to withdraw an Exchange Notice;
- (f) any exchange of Units for units will be effected subject to any requirements or restrictions applicable to the realisation of Units, the issue of units, any applicable Minimum Holding requirements, any applicable minimum initial investment sum or minimum subsequent investment sum;
- (g) CPF Units may only be exchanged or converted to units of a Group Trust that may be purchased with CPF monies;

- (h) each Unit to be exchanged shall be valued at not less than the Realisation Price per Unit and each Unit to be issued shall be valued at not more than the Issue Price per Unit;
- (i) an exchange of Units for units will be effected by the Holder realising his Units. The net proceeds of this realisation will then be utilised to subscribe for units of the relevant Group Trust at the prevailing issue price of the units of the relevant Group Trust;
- (j) an exchange of units for Units will be effected by the managers of that Group Trust realising the units of that Group Trust and paying the net proceeds of the realised units to the Managers. The Managers will then issue Units at the prevailing Issue Price;
- (k) where the Initial Sales Charge paid for the Units being exchanged (the "**First Initial Sales Charge**") is less than the initial sales charge payable for the units being acquired (the "**Second Initial Sales Charge**"), the Managers shall be entitled to charge for the difference, but where the Second Initial Sales Charge is less than the First Initial Sales Charge, the Managers shall be entitled to retain the difference;
- (l) the Trustee shall have no responsibility or liability to ensure that the provisions of the trust deed constituting the Group Trust relating to the issue, realisation or exchange of units are complied with; and
- (m) the Managers may, at their discretion, reject any Exchange Notice.

For the purpose of this paragraph 45, "**Group Trust**" means a unit trust scheme the managers of which:

- (i) are the Managers or a corporation under their control or under common control with them or at least 50 per cent of the share capital of which is held by a corporation which is a shareholder of the Managers; and
- (ii) approve the terms of any exchange which may be made pursuant to Clause 12(JA) of the Deed.

XIV CONVERSION OF UNITS

46. Subject to such restrictions as may be stipulated in this Prospectus or the Deed, a Holder of Units of a Sub-Fund (the "**Original Sub-Fund**") shall have the right from time to time to convert all or any of the Units of the Original Sub-Fund held by him into Units of another Sub-Fund (the "**New Sub-Fund**") subject to the following:

- (a) the right of conversion is exercisable by such Holder giving to the Managers through the approved distributor(s) from whom he purchased the Units of the Original Sub-Fund a Conversion Notice. Institutional investors who had purchased their Units of the Original Sub-Fund directly from the Managers may exercise the right of conversion by giving to the Managers a Conversion Notice;
- (b) no conversion of Units may be made which would result in such Holder holding less than the Minimum Holding of either the Original Sub-Fund or the New Sub-Fund;
- (c) a Holder shall not have the right to convert Units of a Sub-Fund denominated in one currency held by him to Units of another Sub-Fund denominated in a different currency;
- (d) the conversion of Units of the Original Sub-Fund shall be made on the Common Dealing Day on which the Conversion Notice is received by the Managers through their approved distributor(s) or (if not received on a Common Dealing Day) on the next following Common Dealing Day. For this purpose, a "**Common Dealing Day**" is a day

which is both a Dealing Day in relation to Units of the Original Sub-Fund and a Dealing Day in relation to Units of the New Sub-Fund;

- (e) no Units shall be converted during any period when the right of Holders to require the realisation of Units is suspended pursuant to Clause 12(F)(ii) of the Deed or on any Common Dealing Day on which the number of Units of the Original Sub-Fund that can be realised by any Holder is limited pursuant to Clause 12(I) of the Deed; and
- (f) the Managers are entitled to impose a Conversion Fee upon the sum available for payment for Units of the new Sub-Fund to be issued. The Conversion Fee is to be of an amount not exceeding one per cent. (1%) of such sum or S\$500, whichever is lower, rounded to the nearest one cent (S\$0.01).

XV OBTAINING PRICES OF UNITS

47. The Issue Price and Realisation Price of Units will be available on the Business Day following each Dealing Day.

You may check such prices on the Managers' website at <http://www.nikkoam.com.sg>. You should note however that the Issue Price and Realisation Price of the relevant Units will be made available on the Managers' website only after such Units are made available for subscription in Singapore.

XVI SUSPENSION OF DEALINGS

- 48.1 Subject to the provisions of the Code, the Managers or the Trustee may, with the prior written approval of the other, suspend the issue and/or realisation of Units of any Sub-Fund (except for the Singapore Dividend Equity Fund for so long as it is a Qualifying CIS) or Class (except for the Classes of the Singapore Dividend Equity Fund for so long as the Singapore Dividend Equity Fund is a Qualifying CIS) or the Fund (except for the Singapore Dividend Equity Fund for so long as it is a Qualifying CIS) during:

- (a) any period when any Recognised Stock Exchange²⁰ on which any Authorised Investment²¹ forming part of the Deposited Property (whether of any particular Sub-Fund) for the time being is listed or dealt in is closed (otherwise than for ordinary holidays) or during which dealings are restricted or suspended;

²⁰ "**Recognised Stock Exchange**" means any stock exchange of repute and in relation to any particular Authorised Investment shall be deemed to include any responsible firm, corporation or association dealing in the Authorised Investment and any responsible mutual fund or subsidiary thereof or unit trust or collective investment scheme issuing and redeeming participations or units (as the case may be) so as to provide in the opinion of the Managers a satisfactory market for the Authorised Investment and in such a case the Authorised Investment shall be deemed to be the subject of an effective permission to deal or listing on the stock exchange deemed to be constituted by such firm, corporation, association, mutual fund or subsidiary thereof or unit trust scheme or collective investment scheme.

²¹ "**Authorised Investment**" means:-

- (i) any Quoted Security (as defined in footnote 23 below)
- (ii) any Unquoted Security (as defined in footnote 22 below);
- (iii) any unit or sub-unit or share of a Fund (as defined in the Deed);
- (iv) any security (as defined in the Deed); and
- (v) any other type of security not mentioned in paragraphs (i) to (iv) above and selected by the Managers for investment of the Deposited Property and approved by the Trustee (such approval to be confirmed in writing);

Provided Always that any Authorised Investment shall be investment or other property, assets or rights for the time being approved by the relevant competent authority in Singapore for investment by the Fund, including all investments authorised under the Regulations (as defined in the Deed), to enable the Fund to qualify as a CPFIS-registered Unit Trust Scheme (as defined in the Deed), and further provided that each of such Authorised Investments shall be a permissible investment under Appendix 1 of the Code and (in respect of the Singapore Dividend Equity Fund only and for so long as it is a Qualifying CIS) shall also be an eligible asset under Part II of the Standards of Qualifying CIS.

- (b) the existence of any state of affairs which, in the opinion of the Managers might seriously prejudice the interest of the Holders (whether of any particular Sub-Fund or Class) as a whole or of the Deposited Property (whether of any particular Sub-Fund);
- (c) any breakdown in the means of communication normally employed in determining the price of any of such Authorised Investments or the current price on any Recognised Stock Exchange or when for any reason the prices of any of such Authorised Investments cannot be promptly and accurately ascertained;
- (d) any period when remittance of money which will or may be involved in the realisation of such Authorised Investments or in the payment for such Authorised Investments cannot, in the opinion of the Managers or the Trustee, as the case may be, be carried out at normal rates of exchange;
- (e) any period when the fair value of a material portion of the Authorised Investments cannot be determined;
- (f) the period of 48 hours (or any longer period that the Manager and the Trustee agree) prior to the date of any meeting (or adjourned meeting) of Holders of the Fund or the Sub-Fund or the Class convened in accordance with the provisions of the Deed;
- (g) any period pursuant to an order or direction by the Authority; or
- (h) such circumstances as may be required under the provisions of the Code.

48.2 For so long as the Singapore Dividend Equity Fund is a Qualifying CIS, subject to the provisions of the Code and the Standards of Qualifying CIS, the Managers may suspend the issue and/or realisation of Units of the Singapore Dividend Equity Fund or any Class of the Singapore Dividend Equity Fund when:

- (a) dealings in a material portion of the assets of the Singapore Dividend Equity Fund are restricted or suspended, provided that the Trustee is consulted;
- (b) it is not in the best interests of the Holders of the Singapore Dividend Equity Fund to liquidate a material portion of the assets of the Singapore Dividend Equity Fund, provided that the Trustee's approval is obtained;
- (c) the market value or fair value of a material portion of the assets of the Singapore Dividend Equity Fund cannot be determined, provided that the Trustee's approval is obtained;
- (d) instructed by the Authority in the interest of protecting the rights of Holders of the Singapore Dividend Equity Fund; or
- (e) such circumstances as may be required under the provisions of the Code and the Standards of Qualifying CIS.

48.3 The Managers may, with the approval of the Trustee, limit the total number of Units of any Sub-Fund or Class which Holders may realise and which the Managers are entitled to have cancelled pursuant to Clause 11 of the Deed on any Dealing Day to ten per cent. (10%) of the total number of Units of such Sub-Fund or Class then in issue (disregarding any Units in such Sub-Fund or Class which have been agreed to be issued), such limitation to be applied *pro rata* to all Holders of such Sub-Fund or Class who have validly requested realisations on such Dealing Day including the Managers where applicable, so that the proportion so requested to be realised or cancelled pursuant to Clause 11 of the Deed is the same for all Holders and the Managers. Any Units which, by virtue of the powers conferred on the Managers by Clause 12(1) of the Deed, are not realised or cancelled (as the case may be) shall be realised or cancelled

(subject to any further application of Clause 12(l)) on the next succeeding Dealing Day Provided That if on such next succeeding Dealing Day, the total number of Units of such Sub-Fund or Class to be cancelled or realised (as the case may be), including those carried forward from any earlier Dealing Day, exceeds such limit, the Managers may further carry forward the requests for realisation or cancellation (as the case may be) until such time as the total number of Units of such Sub-Fund or Class to be realised or cancelled (as the case may be) on a Dealing Day falls within such limit. If Realisation Requests are carried forward as aforesaid, the Managers shall, within seven (7) days, give notice to the Holders affected thereby that such Units in such Sub-Fund or Class have not been realised or cancelled and that (subject as aforesaid) they shall be realised or cancelled on the next succeeding Dealing Day.

- 48.4 If, immediately after any Business Day, the number of Units of a Sub-Fund or Class in issue or deemed to be in issue, having regard to realisations and issues of such Sub-Fund or Class falling to be made by reference to that Business Day, would be less than such proportion (not exceeding ninety per cent. (90%)), as may be determined by the Managers from time to time, of the number of Units of such Sub-Fund or Class in issue or deemed to be in issue on that Business Day, the Managers may, with a view to protecting the interests of all Holders of any Sub-Fund or Class and with the approval of the Trustee, elect that the Realisation Price in relation to all (but not some only) of the Units of such Sub-Fund or Class falling to be realised by reference to that Business Day shall, instead of being the price calculated as hereinbefore mentioned, be the price per Unit of such Sub-Fund or Class which, in the opinion of the Managers, reflects a fairer value for the Deposited Property attributable to such Sub-Fund or Class having taken into account the necessity of selling a material proportion of the Investments at that time constituting part of the Deposited Property attributable to such Sub-Fund or Class; and the Managers may by giving notice to the Holders of Units of such Sub-Fund or Class affected thereby within two (2) Business Days after the relevant day, suspend the realisation of those Units for such reasonable period as may be necessary to effect an orderly realisation of the Authorised Investments (provided that such suspension is subject to the provisions of the Code and (in respect of Singapore Dividend Equity Fund only and for so long as it is a Qualifying CIS) the Standards of Qualifying CIS). For the purposes of this paragraph, the “fairer value” for the Deposited Property shall be determined by the Managers in consultation with a Stockbroker (as defined in the Deed) or an approved valuer and with the approval by the Trustee. The “material proportion” of the Authorised Investments means such proportion of the Authorised Investments which when sold will cause the reduction of the NAV of the Deposited Property attributable to such Sub-Fund or Class.

- 49.9 You should note that the investment objective, policy, focus and approach of the Nikko AM Global Dividend Equity Fund was changed with effect from 16 December 2013 and that the returns for the Nikko AM Global Dividend Equity Fund (as shown in the tables in paragraphs 49.1 and 49.2) also relate to a period prior to the change of investment objective, policy, focus and approach of the Nikko AM Global Dividend Equity Fund. You should also note that the SGD Class and the USD Class of the Nikko AM Global Dividend Equity Fund have been respectively re-designated as the SGD Hedged (Acc) Class and the USD (Acc) Class of the Nikko AM Global Dividend Equity Fund with effect from 16 December 2013.

- 49.10 You should note that in respect of the Horizon Global Bond Fund (S\$ Hedged), the performance returns as shown in the tables in paragraphs 49.1 and 49.2 may be affected by the swing pricing used by the Underlying Fund. You should also note that (1) it is possible that the returns of the Horizon Global Bond Fund (S\$ Hedged) may be influenced by the level of trading activity in the Underlying Fund, in addition to the Horizon Global Bond Fund (S\$ Hedged)'s investments and (2) swing pricing (used at the Underlying Fund level) can increase the variability of the returns of the Horizon Global Bond Fund (S\$ Hedged).
- 49.11 The returns for the Sub-Funds as shown in the tables in paragraph 49.1, 49.2, 49.3 and 49.4 are not necessarily indicative of future performance of the Sub-Funds.
- 49.12 As required under the regulations made under the Securities and Futures Act (Cap. 289), this Prospectus does not contain any information on past performance based on simulated results of a hypothetical collective investment scheme.

Performance of benchmark (where applicable)

50. The benchmarks (if any) against which the performance of the Sub-Funds are measured are as follows:

	<u>Benchmark</u>
Horizon Global Bond Fund (S\$ Hedged)	Barcap Global Aggregate Index (SGD Hedged)*
Singapore Dividend Equity Fund	Prior to 1 November 2017: Straits Times Index (STI) With effect from 1 November 2017: Nil
Horizon Singapore Fixed Income Enhanced Fund	Markit iBoxx ALBI Singapore Government Bond Index
Nikko AM Global Dividend Equity Fund	Nil

* Previously known as the Lehman Brothers' Global Aggregate (SGD Hedged) Index.

- 50.1 Until 30 June 2001, the DBS 50 Index was used as the benchmark of Singapore Dividend Equity Fund instead of the Straits Times Index (STI) and the switch was made due to the discontinuation of the DBS 50 Index.

With effect from 1 November 2017, the benchmark of the Singapore Dividend Equity Fund has been removed and there is no benchmark for this Sub-Fund. This is because pursuant to the investment objective of this Sub-Fund, this Sub-Fund is managed on a total return basis and as such, it does not seek to outperform any benchmark.

- 50.2 Until 30 September 2001, the SSB World Government Bond Index was used as the benchmark of Horizon Global Bond Fund (S\$ Hedged) instead of the Lehman Brothers' Global Aggregate Index and the switch was done as the Managers believe it provides a broader coverage of the investments of Horizon Global Bond Fund (S\$ Hedged) compared to the SSB World Government Bond Index. Until 1 May 2003, the TOPIX Index was used as a component of the composite benchmark for the Nikko AM Global Dividend Equity Fund instead of the TOPIX Dividend Included Index and the switch was done as the Managers believe it is more appropriate to use the TOPIX Dividend Included Index which takes into account the dividends of the component stocks.

- 50.3 The portion of the benchmark for the Nikko AM Global Dividend Equity Fund allocated to the MSCI All Country Pacific Basin ex-Japan Free Index was changed to the MSCI All Country Asia Pacific ex-Japan Index with effect from 1 August 2006 and was changed to the Russell Asia Pacific ex Japan (All cap) Index with effect from 1 April 2011. The portion of the benchmark for the Nikko AM Global Dividend Equity Fund allocated to the FTSE World Europe ex-UK Index was changed to the Russell Developed Europe ex-UK Large Cap Index (net) with effect from 1 April 2011. The benchmark of the Nikko AM Global Dividend Equity Fund was changed from the composite benchmark of Russell 1000[®] Net 30% Index, FTSE All Share Index, TOPIX Dividend Included Index, Russell Developed Europe ex-UK Large Cap Index (net) and Russell Asia Pacific ex Japan (All cap) Index, according to their regional weights from time to time, to the MSCI All Country World Index, USD base with effect from 16 December 2013 in order to better reflect the new investment objective, focus and approach of the Nikko AM Global Dividend Equity Fund that also took effect on 16 December 2013. With effect from 1 December 2016, the benchmark for the Nikko AM Global Dividend Equity Fund (i.e. MSCI All Country World Index, USD base) has been removed and there is no benchmark for this Sub-Fund. This is because pursuant to the investment objective of the Nikko AM Global Dividend Equity Fund, the Nikko AM Global Dividend Equity Fund is managed on a total return basis and as such, it does not seek to outperform any benchmark.
- 50.4 The benchmark of the Horizon Singapore Fixed Income Enhanced Fund was changed from the 3-month SIBID rate to the UOB Singapore Government Bond All Index with effect from 1 August 2006. This allows the Managers further flexibility to invest along the duration curve in order to better meet the investment objectives of the Sub-Fund.

With effect from 1 June 2017, the benchmark for the Horizon Singapore Fixed Income Enhanced Fund was changed from the UOB Singapore Government Bond All Index to the Markit iBoxx ALBI Singapore Government Bond Index (the "**New Benchmark**"). This is because the UOB Singapore Government Bond All Index was discontinued and the Managers had assessed the New Benchmark to be representative of the Horizon Singapore Fixed Income Enhanced Fund's investment strategy and hence to be a suitable replacement benchmark for the Horizon Singapore Fixed Income Enhanced Fund.

XVIII SOFT DOLLAR COMMISSIONS/ARRANGEMENTS

53.1 Appointment of soft dollar brokers

The Managers will only appoint soft dollar brokers onto their broker panel after they have ensured that:

- a) full disclosure of the practice of accepting soft dollars is made;
- b) the commission rates charged are comparable with the market rates;
- c) there is no conflict of interest;
- d) the soft dollar credits are used only for clearly defined services;
- e) at all times trades are executed through the respective brokers only on the basis of best execution regardless whether soft dollar benefits will accrue. Best execution shall include competitive prices with smooth execution ability; and
- f) relevant regulations and guidelines are complied with.

The procedures for the appointment of the brokers shall be no different from that of normal full service brokers.

Execution and allocation

If the Trustee objects to the use of the soft dollar brokers, the trades of the Sub-Funds shall be segregated from the rest of the trades that are executed through the relevant soft dollar broker(s). The Managers will execute trades for such accounts only with authorised full service brokers.

The Managers are responsible for ensuring that the allocation quotas are adhered to. In addition, the Managers will monitor the execution ability of the soft dollar brokers and assign the business strictly on a “best execution” basis.

53.2 Subject to the provisions of the Code, in their management of the Sub-Funds, the Managers may receive soft dollar commissions from, or enter into soft dollar arrangements with, stockbrokers who execute trades on behalf of the Sub-Funds and the soft dollars received would be restricted to the following kinds of services:

- (a) specific advice as to the advisability of dealing in, or of the value of any investments;
- (b) research and advisory services;
- (c) economic and political analysis;
- (d) portfolio analysis including valuation and portfolio measurements;
- (e) market analysis;
- (f) data and quotation services;
- (g) computer hardware or software that are used to support the investment decision making process, the giving of advice, or the conduct of research or analysis; and
- (h) custodial services in relation to the investments managed for clients.

The following are, however, prohibited:

- a) travel, accommodation and entertainment expenses;
- b) general administrative goods and services including office equipment and premises;

- c) membership fees;
- d) employee salaries; and
- e) direct money payments / rebates.

The Managers will retain the records of the payments made using soft dollar commissions.

Please note that with effect from 25 January 2018, the Managers have ceased to receive soft dollar commissions, or enter into soft dollar arrangements, in their management of the Sub-Funds.

53.3 **Russell Investments' underlying investment advisers' participation in soft dollars/soft commissions**

Each of the money managers (appointed by Russell Investments) and/or Russell Investments may enter into transactions on a soft commission basis, i.e., utilise the services and expertise of brokers in return for the execution of trades through such brokers, provided that the transactions are entered into on the principle of best execution, the benefits provided in the transaction will assist in the provision of investment services to the RIC, and such transactions are disclosed in the next succeeding annual or half-yearly report of the RIC. Where appropriate, any such arrangements will comply with the requirements of Article 11 of the MiFID II Delegated Directive. Any transaction must be in the best interests of Shareholders and must provide benefits that will assist in the provision of investment services to the RIC.

Russell Investments' soft commission and commission recapture programme

Russell Investments retains the right to request that the investment advisers participate in Russell Investments' soft commission and commission recapture programme (**the "Programme"**) through the use (and execution) of a portion of the fund's trading activity through various brokers. Russell Investments' Programme is administered by Recapture Services, a division of BNY ConvergeEx Execution Solutions LLC ("**BNY**"). Participation in Russell Investments' Programme is not mandatory and the appropriate participation percentage target is determined on an investment adviser by investment adviser basis, based upon asset class, investment mandate, trading habits, and tolerance for participation. Participation is always subject to an investment adviser's ability to obtain best execution.

As a result of this trading activity, BNY will set aside a portion of these commissions as "credits". Credits generated for soft commissions will be used by Russell Investments to purchase research that will aid Russell Investments in its investment decision-making process. Research used by Russell Investments will meet local regulations in terms of services that are eligible based on local regulatory guidance. All soft commission use is overseen by Russell Investments' soft commission committee which is made up of senior level investment personnel. The committee, with the guidance of Russell Investments' investment strategy committee will establish an annual soft commission budget. Once this budget has been met all future commissions will be recaptured directly back to the funds from which the commissions were generated. Russell Investments does not receive any revenue (directly or indirectly from BNY or any broker) from the commission recapture component of the Programme.

53.4 The Sub-Managers do not receive or intend to receive any soft dollars in their management of the Nikko AM Global Dividend Equity Fund.

XIX CONFLICTS OF INTEREST

- 54.1 The Managers may from time to time have to deal with competing or conflicting interests arising from other funds managed by the Managers. For example, the Managers may make a purchase or sale decision on behalf of some or all of the other funds managed by them without making the same decision on behalf of any Sub-Fund, as a decision whether or not to make the same investment or sale for any Sub-Fund depends on factors such as the cash availability and portfolio balance of such Sub-Fund. However, the Managers will use their reasonable endeavours at all times to act fairly and in the interests of the relevant Sub-Fund. In particular, after taking into account the availability of cash and the relevant investment guidelines of the other funds managed by the Manager and the relevant Sub-Fund, the Managers will endeavour to ensure that securities bought and sold will be allocated proportionally as far as possible among the other funds managed by the Managers and the relevant Sub-Fund. The Managers may also transact on each Sub-Fund's behalf with its affiliates. The Managers intend to deal with any conflicts of interests, whether arising from the Horizon Global Bond Fund (S\$ Hedged)'s investments in the Underlying Fund or otherwise, in a manner consistent with any applicable guidelines which may be issued from time to time by the Investment Management Association of Singapore.
- 54.2 The Managers are of the view that they are not in a position of conflict in managing their other funds as these funds and the Sub-Funds have different investment universes and investment restrictions. To the extent that there are overlapping investment objectives, the Managers will, as far as practicable, endeavour to have the same securities holdings for such overlapping areas with such securities allocated on a pro-rata basis among the funds. The Deed provides that the Trustee and the Managers shall conduct all transactions with or for the Fund on an arm's length basis. In respect of voting rights where the Managers may face a conflict between their own interest and that of the Holders, the Managers shall cause such voting rights to be exercised in consultation with the Trustee.
- 54.3 The Trustee is presently also offering registrar services to the Sub-Funds while the Custodian (which is a party related to the Trustee) is presently also providing fund administration and valuation services to the Sub-Funds. These services are provided on an arm's length basis and the fees for these services are permitted to be paid out of the Deposited Property of the relevant Sub-Fund under the provisions of the Deed.
- 54.4 The Managers or their affiliates (together the "**Parties**") are or may be involved in other financial, investment and professional activities which may on occasion cause conflicts of interest with the management of the Sub-Funds. Each of the Parties will ensure that the performance of their respective duties will not be impaired by any such involvement. If a conflict of interest does arise, the Parties will endeavour to ensure that it is resolved fairly and in the interest of the Holders.
- 54.5 Associates of the Trustee (the "**Trustee's Associates**") may be engaged to provide financial, banking and brokerage services to the Sub-Funds. Such services where provided, will be on an arm's length basis and the Trustee's Associates shall not be liable to account to any person for any profits or benefits made or derived by them in connection with any such services. If there is a conflict of interest, the Trustee will endeavour to resolve such conflict quickly and in the interest of the Holders in an equitable manner.
- 54.6 The Managers or the Trustee may own, hold, dispose or otherwise deal with Units as though they were not a party to the Deed. If any conflict of interest arises as a result of such dealing, the Managers and the Trustee, following consultation with the other, will resolve such conflict in a

just and equitable manner as they shall deem fit. Such dealings, where entered into, will be on an arm's length basis.

- 54.7 The Sub-Managers may also have to deal with competing or conflicting interests in respect of the Nikko AM Global Dividend Equity Fund with other collective investment schemes or discretionary funds they manage. The Sub-Managers will use reasonable endeavours at all times to act fairly and in the interests of the Nikko AM Global Dividend Equity Fund as required under the legal regulations applicable to them.
- 54.8 For so long as the Singapore Dividend Equity Fund is a Qualifying CIS, any measures taken by the Managers to minimise or deal with conflicts of interest in respect of this Sub-Fund will also be subject to the provisions of the Standards of Qualifying CIS.

XXII OTHER MATERIAL INFORMATION

57. Valuation policy and performance measurement standards of the Managers

You should refer to paragraph 8 of the Appendix for the method of valuation of investments of the Sub-Funds. Valuations shall be done on every Dealing Day. There will not be a suspension of valuation by reason of an exchange holiday. In such cases, the last available security prices shall continue to be applied for valuation purposes.

Notwithstanding the foregoing, the Managers' pricing committee will subject to the provisions of the Code and the conditions set out in section XVI of this Prospectus retain the discretion to suspend valuation if deemed necessary. The Managers' pricing committee is responsible for considering and arriving at a consensus decision to address any pricing disputes or valuation methodology that requires ad hoc decision due to market situation. Subject to the provisions of the Code and (in the case of the Singapore Dividend Equity Fund only and for so long as it is a

Qualifying CIS) the Standards of Qualifying CIS, the Managers may request for approval to suspend the valuation and dealing of a Sub-Fund if the fair value of a material portion of the Sub-Fund's assets cannot be determined.

The Managers collate and maintain portfolio and series data in the performance systems on a periodic basis and generate performance results to meet reporting requirements. Time-weighted rate of return (TWRR) methodology is adopted for portfolio returns calculation.

58. Hard-to-value or illiquid assets

If the most recent available price for a security invested into by a Sub-Fund exceeds one month for reasons of non-availability of prices from regular market sources and/or counterparties, an appropriate liquidity reserve shall be applied on the last available price in accordance with the Managers' pricing and valuation policy. The adjusted price shall be approved by the Managers' pricing committee prior to application.

However, the Singapore Dividend Equity Fund will not engage in securities lending for so long as it is a Qualifying CIS.

Information on the Managers' credit assessment process will be made available to you upon request.
