### KEY PRODUCT FEATURES

#### WHAT ARE YOU INVESTING IN?

- You are investing in an exchange traded fund constituted in Singapore that aims to replicate as closely as possible, before expenses, the performance of the Index or upon the Manager giving three (3) months' prior written notice to the Trustee and the Holders, such other index that gives, in the opinion of the Manager, the same or substantially similar exposure as the Index.
- The Index is compiled and calculated by FTSE International Limited and aims to access REITs across developed and emerging economies in Asia excluding Australia, New Zealand and Japan. The Index constituents are reviewed on a quarterly basis in March, June, September and December.
- Unlike “actively managed” unit trusts and mutual funds, the Manager does not attempt to outperform the Index nor does it seek temporary defensive positions when markets decline or appear overvalued by some standards.
- Distributions, if any, will be determined by the Manager. The Manager currently intends to make quarterly distributions, less the expenses of the Fund, to Holders around January, April, July and October of each year. The Manager will decide whether a distribution is to be made based on various factors, including dividend and/or interest income and/or capital gains derived from the investments of the Fund. In addition to distributions to Holders out of distributable income and/or capital gains, the Manager may make distributions to Holders out of the capital of the Deposited Property in accordance with the provisions of the Trust Deed. Where distributions are paid out of capital, the NAV of the Fund will be reduced and this will be reflected in the redemption price of the Units. Holders redeeming their Units may therefore receive an amount less than their initial investment. Such distributions may also result in reduced future returns to Holders.
- The base currency of the Fund is SGD and the Fund will issue Units denominated in SGD. You should note that the Units are Excluded Investment Products.

Investment Strategy

- **Lack of discretion by Manager to adapt to market changes**
    - o The Index Securities held by the Fund will passively reflect the distribution of REITs whose securities comprise the Index. Therefore, adverse changes in the financial condition or performance of any REIT included in the Index will not result in the sale of the securities of such REIT, and will be likely to affect adversely the Fund's value and the trading price of the Units. The Manager will have limited discretion to remove the securities of such REIT from the Fund.
  - **Risk associated with the investment strategy of the Fund**
    - o Unlike "actively managed" unit trusts and mutual funds, in its management of the Fund, the Manager does not attempt to outperform the Index nor does it seek temporary defensive positions when markets decline or appear overvalued by some standards. Accordingly, a fall in the Index may result in a corresponding fall in the NAV of the Fund.
- You should be aware that your investment in the Fund may be exposed to other risks of an exceptional nature from time to time.**
