³ Audited expense ratio for the financial year ended 30 June 2024.

<ul style="list-style-type: none"> • The Index is compiled and calculated by FTSE International Limited and represents the top 30 companies listed on the SGX-ST Mainboard ranked by market capitalisation. The Index Shares are reviewed semi-annually in March and September and quarterly reviews in June and December were introduced from December 2012 to include eligible new issues that meet eligibility criteria. • Unlike “actively managed” unit trusts and mutual funds, the Manager does not attempt to outperform the Index nor does it seek temporary defensive positions when markets decline or appear overvalued by some standards. • Distributions, if any, will be determined by the Manager. The Manager currently intends to make distributions to Holders semi-annually around January and July of each year. The Manager will decide whether a distribution is to be made based on various factors, including dividend and/or interest income and/or capital gains derived from the investments of the Fund. In addition to distributions to Holders out of distributable income and/or capital gains, the Manager may make distributions to Holders out of the capital of the Deposited Property in accordance with the provisions of the Trust Deed. Where distributions are paid out of capital, the NAV of the Fund will be reduced and this will be reflected in the Redemption Price of the Units. Holders redeeming their Units may therefore receive an amount less than their initial investment. Such distributions may also result in reduced future returns to Holders. • The base currency of the Fund is SGD and the Fund will issue Units denominated in SGD. 	<p>on features of the product. Investment Strategy	
<ul style="list-style-type: none"> • The Manager will seek to achieve the Fund’s investment objective by investing all, or substantially all of the Fund’s assets in Index Shares in substantially the same weightings as reflected in the Index (i.e. using a full replication strategy). The Manager may in its absolute discretion also invest in non-Index Shares to achieve the Fund’s investment objective. • The Manager will rebalance the Fund’s portfolio of investments from time to time to reflect any changes to the composition of, or the weighting of securities in the Index with a view to minimising tracking error of the Fund’s overall returns relative to the performance of the Index. Such rebalancing may be in the form of investments in non-Index Shares. The Fund may engage in securities lending or repurchase transactions where such securities lending or repurchase transactions are carried out solely for the purpose of efficient portfolio management and do not amount to more than 50% of the NAV of the Fund, and is in line with the Notice on the Sale of Investment Products issued by the Monetary Authority of Singapore (as may be amended from time to time). 	<p>Refer to Section VI of the Prospectus setting out the description of the investment strategy of the Fund.</p>

KEY RISKS	
<p>WHAT ARE THE KEY RISKS OF THIS INVESTMENT?</p> <p>You should be aware that the price of Units can go down as well as up. The value of the product and its dividends or coupons may rise or fall. The</p>	<p>Refer to Section IX of the Prospectus for further information on risks of the product.</p>

<p>following are key risk factors that may cause you to lose some or all of your investment:</p>	
<p>Market and Credit Risks</p>	
<ul style="list-style-type: none"> • Units may trade at prices other than NAV <ul style="list-style-type: none"> ○ The secondary market price of Units may sometimes trade above or below the NAV per Unit. This deviation is dependent on various factors but will be accentuated when there is a large imbalance between market supply and demand for Units on the SGX-ST. There is a risk that you may not be able to buy or sell at a price close to the NAV per Unit. • You are exposed to market risk in Singapore <ul style="list-style-type: none"> ○ The price of securities comprised in the portfolio of the Fund and the Units, and the income from them, may be influenced by political and economic conditions, changes in interest rates, the earnings of the corporations whose securities are comprised in the portfolio and the market's perception of the securities. 	
<p>Liquidity Risks</p>	
<ul style="list-style-type: none"> • You are exposed to liquidity risk <ul style="list-style-type: none"> ○ The extent of market liquidity is dependent on the size and state of the markets and therefore affects the Fund's ability to acquire or dispose of assets at the price and time it so desires. • You should be aware there is a minimum creation and redemption size <ul style="list-style-type: none"> ○ Units will only be issued or redeemed in-kind in Creation Unit or Redemption Unit aggregations (currently 500,000 Units, and multiples thereof). ○ If you hold less than this minimum size, you may only be able to realise the value of your Units by: (i) selling your Units on the SGX-ST at the prevailing trading price of the Units; or (ii) (if you hold at least 50,000 Units) redeeming your Units for cash on each Cash Dealing Day through a Participating Dealer in multiples of 50,000 Units. ○ However, do note that the Participating Dealers are under no obligation to redeem your Units. • Trading in Units on SGX-ST may be suspended or even delisted <ul style="list-style-type: none"> ○ You will not be able to purchase or sell Units on the SGX-ST during any period that the SGX-ST suspends trading in the Units. Subject to the provisions of the CIS Code, the creation and redemption of Units will also be suspended if the trading of Units on the SGX-ST is suspended. ○ The Fund may not be able to continue to meet the requirements necessary to maintain listing of Units on the SGX-ST. The Fund may be terminated if Units are delisted from the SGX-ST. 	<p>Refer to Sections IX and XIII of the Prospectus for situations in which trading of Units may be suspended.</p>
<p>Product-Specific Risks</p>	
<ul style="list-style-type: none"> • You are exposed to tracking error risk <ul style="list-style-type: none"> ○ Changes in the NAV of the Fund are unlikely to replicate exactly changes in the Index due to various factors. The Fund's returns may therefore deviate from those of the Index. • Risk associated with the investment strategy of the Fund/Lack of discretion by Manager to adapt to market changes <ul style="list-style-type: none"> ○ Unlike "actively managed" unit trusts and mutual funds, in its management of the Fund, the Manager does not attempt to outperform the Index nor does it seek temporary defensive positions when markets decline or appear overvalued by some standards. Accordingly, a fall in the Index may result in a corresponding fall in the NAV of the Fund. <p>You should be aware that your investment in the Fund may be exposed to other risks of an exceptional nature from time to time.</p>
