KEY PRODUCT FEATURES

WHAT ARE YOU INVESTING IN?

- You are investing in a unit trust constituted in Singapore that aims to provide capital appreciation over the medium to long term.
- In respect of each of the Classes except for the JPY Class, the Manager currently does not intend to make any distributions. In respect of the JPY Class Units, the Manager currently intends to make semi-annual distributions on or around June and December of each year.
- The Manager will decide whether a distribution is to be made based on various factors, including dividend and/or interest income and/or capital gains derived from the investments of the Fund (collectively, the “Investment Income”). If the Investment Income is insufficient to fund a distribution, the Manager may determine that such distributions should be paid from the capital of the relevant Class. Where distributions are paid out of the capital of a Class, the NAV of that Class will be reduced.

Refer to Para 5, 7.1 and 7.4 of the Prospectus for further information on features of the product.
